- Imagine Kiera knightly and Dominic Cumberbatch

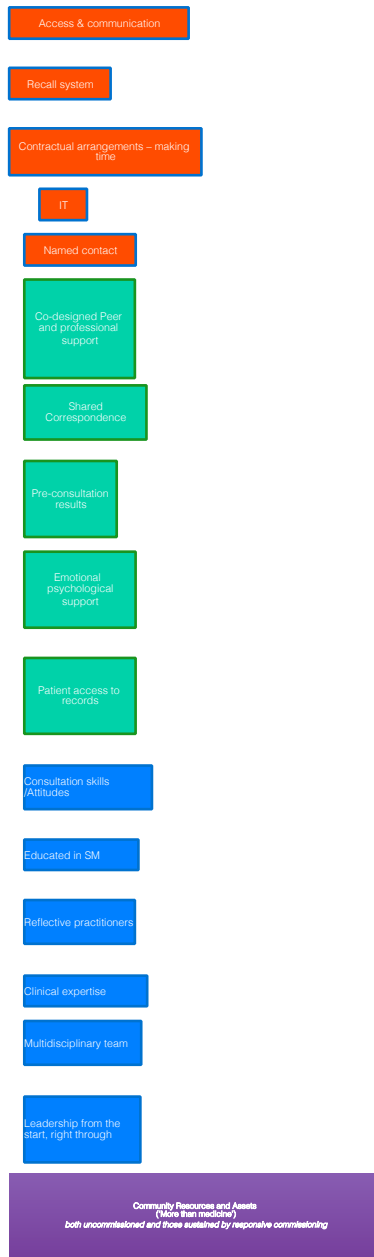

Richard Wilkinson & Kate Picket

The Spirit Level: Why More Equal
Societies Almost Always Do Better.

Components of the evaluation.....

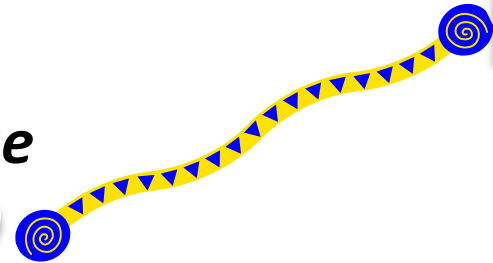

Components of the evaluation.....

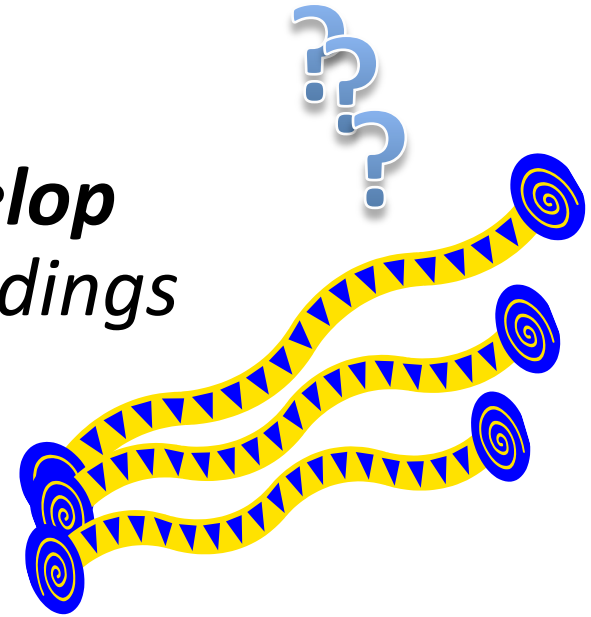

Phase 1

- Having set out roughly what you were trying to achieve, and how you plan to do it (**Ready**) - starting doing it (**Fire**).
- Then.....you consciously make space (time, resource permission) to ...
- set out your initial understanding of what you thought the effective elements* were ,which plausibly led to your initially named **outcomes** (working ***theory of change*** mark 1) aka **Aim**.
 - *an admixture of what works for whom in what circumstance, combining the **context** and **mechanism**, - which are words which don't yet resonate for me)
- I.e. What works for whom in what circumstances

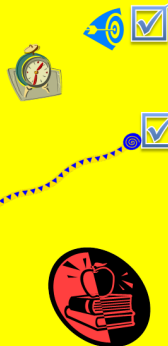

Phase 2

- *BUT you have **to change and develop** and **set out** your initial understandings of the relevant **Context***
- *And **Mechanism** in the light of emerging findings/
experience/circumstances ,*
- Which you reckon will lead to your (partially) modified and possibly growing set of **outcomes**

Origins of Anticipatory Care & Keep Well

Inverse Care Law

Dr Julian Tudor Hart

***“The availability of good medical
care tends to vary inversely with
the need for the population
served”***

The Lancet February 1971

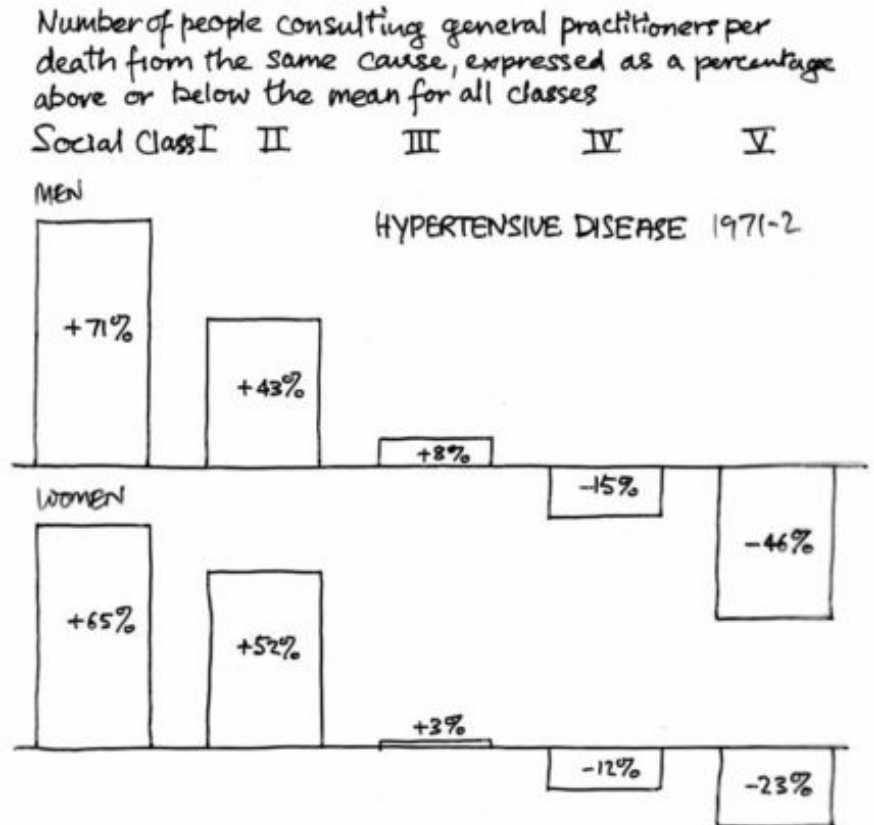

Inverse Care Law

***“People who need most
get least”***

Julian Tudor Hart
